

Product Name: TaskFlask

Team Name: The Goatz

Sprint Completion Date: July 3, 2026

Revision Number: 2.0

Revision Date: July 3, 2026

Goal

Add sprint management under each project.

User Stories and Tasks

User Story 1

As a user, I want to create, view, edit, and delete sprints inside a project, so that I organize work into a smaller development cycle. [3]

- Add the sprints table and project relationship to the database schema. (2 hours)
- Create database queries for creating, retrieving, updating, and deleting sprints. (3 hours)
- Write tests for sprint CRUD operations and invalid input. (1 hours)

User Story 2

As a user, I want to mark a sprint as completed or reopen it if needed, so that I can keep the sprint status accurate from the project changing through time. [3]

- Add Active and Completed sprint status values to the database and validation logic. (1 hour)
- Record the sprint's completion timestamp when it is completed. (1 hour)
- Write tests for completing and reopening sprints. (1 hours)

User Story 3

As a user, I want to see simple sprint progress, including total tasks, To Do, In Progress, Done, percent complete, so that I can see the amount of work that is completed and still needs to be done. [5]

- Create database queries that count tasks in each sprint status. (2 hours)
- Display total tasks and status counts on the sprint page. (2 hours)
- Add an empty progress state for sprints without tasks or story points. (1 hour)

User Story 4

As a user, I want to see whether a project has active or completed sprints, so that I can get the current status of the project without having to open every sprint up. [3]

- Create database queries that count active and completed sprints for each project. (2 hours)
- Display the project's sprint count on the Projects page. (1 hour)
- Write tests for active and completed sprint counts. (1 hours)

Team Roles

Ian Keilman: Product Owner, Frontend

Kunwarpal Singh: Scrum Master, Frontend, Backend, Documentation

Karen Gurovith: Frontend, Backend, Testing

Minh La: Frontend, Backend

Faizan Idrees: Frontend, Backend

Initial Task Assignment

Ian Keilman

- Create reopen sprint route

- Add the transition button used for both completing and reopening sprints.

Karen Gurovith

- Create Edit Sprint Route.
- Test the Sprint CRUD workflow.
- Create a Sprint Form Template.

Kunwarpal Singh

- Make it so that simple sprint progress can be seen
- Calculate the amount in percentage that is complete.
- Create, view, edit, and also delete Sprints.

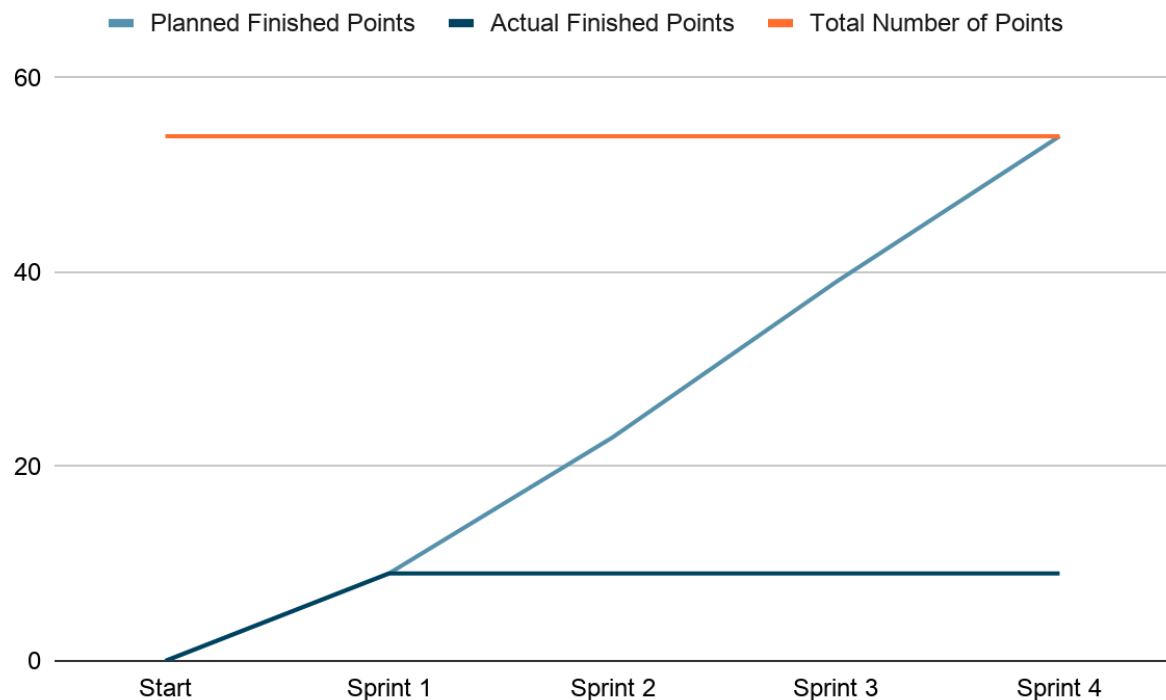

Minh La

- Add visual labels
- Test project page status display
- See active or completed sprints

Faizan Idrees:

- Create, view, edit, and also delete Sprints.
- Create the reopen sprint route.
- Test the Sprint CRUD workflow.
