

Product Name: TaskFlask

Team Name: The Goatz

Date: July 7, 2026

Actions to Stop Doing

1. Waiting until the last minute to start tasks
2. Forgetting to test changes
3. Having unproductive meetings

Actions to Start Doing

1. Start tasks earlier and finish them on time (committing our work to Git on time)
2. Sharing progress as often as we can
3. Testing features first before starting tasks that are meant to be worked on in the future.
4. Complete user stories on time

Actions to Keep Doing

1. Asking for help when anyone is stuck on a problem with creating or editing parts of the code base
2. Attending our weekly meetings
3. Reviewing each other's work

Work Completed/Not Completed

Completed User Stories

User Story 1

As a user, I want to create, view, edit, and delete sprints inside a project, so that I organize work into a smaller development cycle. [3]

User Story 2

As a user, I want to mark a sprint as completed or reopen it if needed, so that I can keep the sprint status accurate from the project changing through time. [3]

User Story 3

As a user, I want to see simple sprint progress, including total tasks, To Do, In Progress, Done, percent complete, so that I can see the amount of work that is completed and still needs to be done. [5]

User Story 4

As a user, I want to see whether a project has active or completed sprints, so that I can get the current status of the project without having to open every sprint up. [3]

Completed Spikes

Spike 1

See how to calculate sprint progress from task statuses so the dashboard looks accurate. [2]

Spike 2

Explore how sprint status can be represented within a database. [1]

Completed Infrastructure Tasks

- Add sprint status fields to the database.
- Add progress calculation helpers.
- Add activity log entries for project and sprint creation.

- Add tests for creating and editing sprints.
- Keep route code readable and easy to follow.

Not Completed

No user stories were not completed within Sprint 2.

Work Completion Rate

User Stories that are Completed per Day: 4 user stories completed / 7 days in a week = 0.571 user stories completed per day.

Ideal Amount of week Completed per Day: 8 work units / 7 days in a week = 1.143 work units per day.
