

Product Name: TaskFlask

Team Name: The Goatz

Date: June 29, 2026

Actions to Stop Doing

1. Waiting until the sprint deadline to check if the app is running correctly as it would be easier to solve the problems if there are any if they are not rushed.
2. Stop keeping the setup details for running the app locally unclear.

Actions to Start Doing

1. The README needs to change whenever the steps change on how to run the app.
2. Smaller tasks should be found more than larger tasks and so the bigger tasks need to be broken down into smaller tasks.
3. The local setup needs to be tested earlier

Actions to Keep Doing

1. Everyone in the group should be focusing on a project structure that is simple as it would allow for the app to be easily run on the device.
2. Spikes should be added as some topics usually need to be researched for each sprint

Work Completed/Not Completed

Completed User Stories

User Story 1

As a developer, I want to clone the repo, install dependencies, initialize the database, and run the app locally, so that I can begin development and testing of the local environment. [2]

User Story 2

As a user, I want to open the home page and navigate the project list, so that I can see where projects are located. [2]

User Story 3

As a user, I want to create, view, edit, and delete projects, so that project information is managed. [3]

User Story 4

As a developer, I want to understand the folder structure without needing a complex framework, so that I can work on the project more easily. [2]

Completed Spikes

Spike 1

Research Flask application factory structure. [1]

Spike 2

Look into SQLite setup. [1]

Completed Infrastructure Tasks

- Setup Flask application factory.
- Setup SQLite database schema.
- Create basic templates and shared layout.
- Add README instructions for local setup.

- Add initial pytest setup.

Not Completed

No user stories were not completed within Sprint 1.

Work Completion Rate

User Stories that are Completed per Day: 4 user stories completed / 7 days in a week = 0.571 user stories completed per day.

Ideal Amount of week Completed per Day: 8 work units / 7 days in a week = 1.143 work units per day.
